

California-based Pertexa Partners with Wichita, KS - CPS LLC as Billing/RCM Partner and Distributor

Pertexa Healthcare Technologies, Inc. is pleased to announce that it has agreed to partner with CPS, LLC of Wichita, Kansas. CPS will be a billing / RCM partner and distributor for all Pertexa offerings including two flagship products, Radekal www.radekal.com and RoboRita www.roborita.com.

CPS (www.getcps.com) was founded in 2009 by Nathan Jabara. It has become one of the premier medical billing and consulting companies in the Midwest. While the company was founded in Kansas, it has grown into a company with a rapidly expanding regional footprint. The company was formed to offer the full range of medical and billing services while recognizing that all medical practices are run differently. We optimize the billing process by performing a detailed assessment of each clients' needs then match that with the best technical solution available in the market.

"I am pleased to provide Pertexa with our complete medical billing support throughout the Midwest. I have been eagerly waiting for development of their physician productivity tool, Radekal. I saw the server-based Radekal 5 years ago and realized it is 10 years ahead of anything in the EHR market. Our company paid for our distribution a couple of years ago and has been awaiting the release of the cloud-based Radekal. I have now worked with new cloud-based Radekal. It was well worth the wait. I know our clients will welcome the much needed 30%+ increase in productivity resulting in 30%+ more revenues or free time. Their 1-page training for physicians is a hit – well done Pertexa". CEO, Nathan Jabara stated.

"CPS and I share the same strategic vision that our software product, Radekal, is not an EHR but a transformative productivity tool built by Doctors for Doctors. It is designed just the way they were trained in medical school. CPS and Pertexa will continue to apply advanced technology to enhance the productivity of doctors, clinics, and skilled nursing facilities utilizing breakthrough software and telehealth hardware solutions." CEO, Kishor Joshi stated.

About Pertexa:

Pertexa, Inc. is a next-generation medical technology company headquartered in Ridgecrest, California that creates and distributes advanced technology including RITA and RADEKAL, the nation's leading Physician's Productivity Tool, which has been shown to increase productivity by 30%. By combining both hardware and app development for worldwide medical use, Pertexa is an innovative brain trust, advancing disruptive transformational technologies for an evolving healthcare environment.
