Pertexa and California Telehealth Network Announce Strategic Partnership

Pertexa (PHT) and California Telehealth Network (CTN), two leaders in promoting the adoption of health information technologies and services to improve access to high quality healthcare in medically-underserved and rural communities across California, have agreed to a strategic partnership to offer PHT's latest productivity tools - Radekal and RITA to communities in need.

Radekal is a multipurpose suite of web based technological tools designed to reduce the amount of time physicians spend on paperwork and patient evaluation by automating diagnosis, prescription creation and progress notes on a variety of devices.

Remote Intelligent Telehealth Assistant (RITA) enables healthcare providers to share information across different EMR platforms in an interoperable fashion.

"We look forward to supporting Pertexa in their efforts to offer Radekal and RITA. We believe these tools could be a big help to healthcare providers in California's rural and medically underserved communities. Working together, CTN can provide affordable and reliable broadband to support these web based applications. This can provide our clinical partners and sites an immediate opportunity to positively impact the productivity of their diverse medical operations," said Eric Brown, President and Chief Executive Officer of CTN.

"We are proud to join CTN as a strategic partner to offer our solutions to underserved parts of our home state because of their clear leadership on issues facing those communities across California. I know and have great confidence in CTN which has become the leader on issues facing rural medical facilities. CTN provides strong IT support capabilities and has earned the trust of the stakeholders they represent. Pertexa wants to stay focused and continue to create innovative software and hardware productivity tools for California and the entire U.S. healthcare market. We need great partners like CTN," said Kishor Joshi, Chief Executive Officer of Pertexa.

About CTN

CTN is California's leading agency focusing on increasing access to quality healthcare with a focus on California's rural communities. An independent, non-profit and 501c3 company, CTN is a product of an unprecedented coalition of stakeholders, including healthcare providers, health plans, technology providers, government agencies and others that are working together to create a telecommunications and health information technology infrastructure that provides a broad range of services to expand and improve the quality of healthcare delivery. CTN also operates the California Telehealth Resource Center (CTRRC) which is the Health Resources and Services Administration (HRSA) funded organization focused on expanding telehealth awareness, training and adoption in California.

About Pertexa

Pertexa, Inc. is a next-generation medical technology company headquartered in Ridgecrest, California that creates and distributes advanced technology including RITA and RADEKAL, the nation's leading Physician's Productivity Tool, which has been shown to increase productivity by 30 percent. By combining both hardware and app development for worldwide medical use, Pertexa is an innovative industry leader, advancing disruptive transformational technologies for an evolving healthcare environment.
