Pertexa Healthcare Technologies (PTH) and Self Care Catalysts (SCC) Sign Strategic Partnership to Integrate SCC's Chronic Care Management Application into PHT's Medical Productivity Software, Radekal, and Telehealth Solution, ROBORITA

Pertexa (PHT), California-based medical company and Self Care Catalysts, Inc of San Francisco, CA and Toronto Canada, a world leader in the development and delivery of advanced chronic care management software to medical systems have agreed to a strategic partnership. The partnership will offer PHT's latest productivity tools (Radekal and RITA) with chronic care management software from SCC. PHT will lead the marketing activity for the combined offering to over 5,000+ medical facilities across the US. In case studies, the Radekal EHR has demonstrated productivity gains of over 30%, significantly reducing the time to note completion and billing. "Self Care Catalysts offerings allow patients to take their medical information home with them, interact with it, supplement it with information from their wearable devices and all other self care activities and get back powerful insights that can inform them, their provider, and industry decision making," says Grace Soyao, CEO of Self Care Catalysts.

"We're proud to join and support Pertexa in their efforts to introduce its physician productivity app, Radekal with our "best in breed" chronic care management solution. Working with Pertexa will accelerate the introduction of our chronic care management solution to markets across the US. As we all know, chronic care management must be a pillar of any serious effort to reduce the costs of health care delivery in the US. Teaming together, we can offer an integrated solution at an affordable cost. This integrated solution when introduced will have an immediate positive impact on the cost and quality of medical care in any facility or clinic" Jared Adams, Chief Medical Officer of SCC states.

"SCC was selected as our chronic care management partner because it is an emerging world leader in this critical technology. After a worldwide search, SCC was selected for their innovative software, medical industry understanding, and software development capability. The only way to bend the cost curve in US medical costs is an integration of productivity tools like Radekal and an easy to use and affordable chronic care management solution." Kishor Joshi, CEO of Pertexa states.

About

Self Care Catalysts is a patient solutions, intelligence and analytics company that enables healthcare innovation. We are committed to advocating for patients and consumers when it comes to healthcare decisions.

Our belief is that when patients are informed, respected, and engaged, they make better choices. Better choices mean better health outcomes.

Our mission is to build innovative, patient-centered, and technology-driven self-care solutions that compliment medical modalities that will enable patients to continue managing their care outside of the clinical setting, with or without the support of healthcare professionals.

The Self Care Catalysts product and service portfolio are designed to provide patient-centric solutions, real world evidence, intelligence, and insights to support business decisions across the product lifecycle.
